Projects

● **Shop.com** 🔄 *Collaborative- Frontend project*

Shop.com is an American Commercial website used for shopping for multiple brands and product.

Features:

- Developed a web application with account creation, login, and signup functionality.
- Implemented a shopping cart feature for users to add products and make payments using card credentials.
- Incorporated filtering and sorting options to enhance the user experience on the product page.

Tech Stack Used:

- HTML / CSS / JavaScript

Key responsibilities:

- Built the Login/Signup logic and UI.
- Built Product page
- Built filter and sort logic

● **KooApp.com** 🔄 *Solo-Full stack project*

Koo is an Indian microblogging and social networking service, based in Bengaluru, India. As of November 2022, the company is valued at over \$275 million

Tech Stack Used:

- ReactJS / Bootstrap / ExpressJS / MongoDB/ Redux

Features Added:

- Developed a responsive web application with user profile creation, login, and signup functionality.
- Enabled users to upload posts, images, and delete posts.
- Implemented a "like" feature to enable users to interact with posts and a commenting feature to facilitate discussions.
- Incorporated the ability to upload posts in multiple languages to expand the reach of the application.

Key responsibilities:

- As it is a solo project it was completely built by me.
